Abstract: Ethics in business organizations has become a major concern nowadays. This survey collects data on different ethical perspectives in business organizations and analyzes ethical issues maintained by organizations. Through this survey, we want to identify how the code of ethics helps the organization to maintain business policy, the importance of trained ethical behavior. We also analyze how ethical behavior is treated in organizations. We assess the value of ethical behavior in decision making in organizations. By this survey, we rummage how managers behave with their employees in organizations. This survey identifies how ethical issues varies organizations to organizations.

I. Introduction

There are many ethical issues in the workplace [1]. The way hard works, intelligent ideas, decision making are important for an organization's success, defining and maintaining a proper ethical policy is also important as well. The lack of practicing of code of ethics in an organization makes its employees dull, employees cannot be motivated much themselves in working sectors. A standard code of conduct concerns an individual's moral judgments about right and wrong behavior.

Besides, organization can achieve consumer loyalty and trust through ethical practices. In addition, the organization's corporate value gets increased. Where there is no code of ethics, the business organization always goes through in problems. This survey analyses the ethical issues mainly in the organizations of Bangladesh. It also analyses an organization of Korea and an organization of Japan. The organizations are mainly Software Company and Pharmaceutical Company and Government Bank.

II. Literature review

Business ethics means corporate ethics that is applied in profession and to all aspects of business conduct [2]. The philosophy of a business is reflected to the business ethics. From ethical perspective, a business should have some responsibilities to society. A multi-country survey 2011 found 30 – 80% support for this view among the informed people. [3] There exist different researches on the ethical issues in business organizations. We analyze the surveys. The survey of ibe [4] assesses managers' attitude and support for maintaining ethical standards of employees at work. According to this survey, the three major areas of public concern regarding business ethics

are executive pay, corporate tax avoidance and bribery and corruption. The analysis procedure of supporting ethics at work is followed. The Institute of Internal Auditors performed a survey [5] to get ideas on auditing ethics and governance. American Management Association conducted survey to identify the factors by which ethics at workplace is influenced. [6] A survey on the organizations of Bangladesh also has been performed by the Department of Business Administration, IIUC, Bangladesh. [7] The survey analyzed the ethical conduct in business organizations of Bangladesh. There is research on the challenges of business ethics in the European Academy of Science and Arts in Salzburg [8]. Survey on ethical standards in life insurance companies in Bangladesh was conducted in September 2014 [9]. By this survey, it is perceived that insurance companies do unethical practices at the expense of the policyholders. There is survey on the perception of ethics in business by the students of Kobe University, Japan [10]. The University of Ljubljana conducted a survey on ethical leadership [11]. In our survey, we identify the ethical issues and make a statistical analysis and prepare findings on the collected data from the workers of business organizations.

III. Methodology

We collected data by both interview and online. For taking the interview, we visited the organization and collected data. For online, we made a Google form [12] and send to different employees of different organizations. We collected data from multiple persons of same organizations to analyze multiple viewpoints for the same organization. We collected data from Software organizations, financial organizations, and pharmaceutical organizations.

Questionnaire: The questionnaire consists of 25 questions. It is not mandatory to answer all questions. Anyone can skip a question if he wishes. Questions are mainly multiple choices. Workers, managers were able to answer the questions.

Following topics are covered as a whole:

- The ethical concern of employees and managers to organizations
- Support for maintaining ethical behavior by organizations
- Realizations about ethical perspectives of the culture of organizations

IV. Analysis

1. Ethical Issues in Business Organizations

From the survey, different ethical issues found in different organization. It observed that each organization follows certain policies for ethics at work.

The employees and managers of different hierarchy level also maintain their code of ethics. We see that about 73% of organizations have their written ethics policy. The ethical issues faced in different business organization are as follows:

Code of conduct: code of conduct is a set of rules outlining the social norms, religious rules and responsibilities of, and or proper practices for, an individual. Each organization creates a formal code of conduct [13]. The behavior of the employees are defined in this.

Figure 1: Analysis of the code of conduct

In the figure, we see that 73.1% of organizations have their written ethics policy and 11.5% have a draft code conduct.

Honesty: Honesty is also a major concern in business organizations. Through the survey, we found that every organization gives an attention to the honesty of the employees and managers. We collected different data on honesty in our survey.

Figure 2: Analysis on the honesty of the managers

We found that 42.3% of managers always behave honestly.38.5% wants to treat honestly as their capability and 15.4% of them behave honestly sometimes.

Green Computing: Green computing also observed as an ethical issue in the organizations. It is important for all kind of system of any scale [14]. Green computing defines the production of safe products for the environment and people. The effect of activities of the organization also included in green computing.

Figure 3: Green computing in organizations

So, we observed 42.3% of organizations having a policy on green computing. The statistics on response also showed that 76.9% of the organizations follow policy to produce safe and effective product and others sometimes follow this policy. Survey also shows that 50% of organizations strongly agree that their products are safe, 34.6% agree and 15.4% neutral about this.

Whistleblowing: Whistleblowing is also a concern business organizations. the A whistleblower (also written as a whistleblower or whistle blower) is a person who exposes any kind of information or activity that is deemed illegal, unethical, or not correct within an organization that is either private or public [15]. Whistleblowing threatens the public interests. There are several incidents recorded whistleblowing in the organizations of Bangladesh. The whistleblowers do this for a financial, any competitive advantages or any criminal purpose also. The survey collects data on whistleblowing and analyzes it.

Figure 4: Analysis on whistleblowing control

The analysis shows that 46.2% of organizations confidently control whistleblowing but fails sometimes, 34.6% control very much confidently and others don't give answer about this.

Software Piracy: In most organizations, software piracy is one of the major issues. Pirated copy of the software is illegal to use.

Figure 5: Software piracy control level

The analysis shows that 34.8% of organizations strongly control software piracy, 53.8% significantly, 11.5% weakly control piracy level.

Data Sharing: Each company uses the data of mass people. They store huge amount of data in their storage. Sharing these data for business is another ethical issue.

Figure 6: Rate of Data sharing for the extra benefit

The analysis shows that 53.8% never share data for

the benefit, 30.8% sometimes share for extra benefit, 7.7% don't know about it and 7.7% share data for the benefit.

Pluralism: It is found from the survey that pluralism exists in all kind of business organization covered by the survey. For pluralism, different issues are created in business organizations. So, this is one of the important ethical issues. Personal ethical behavior varies in different ethnic, cultural, religious, political groups. Nowadays pluralism has become a major concern for maintaining a business in a proper way in Bangladesh.

Figure 7: Pluralism in organizations

From the figure 7, we can see that 42.3% organizations never face or make different behavior for pluralism and others face.

2. Ethical Practices at Workplace

Business Ethics roughly refers to the application of ethical values to business behavior. Honesty or Integrity is a core value as well as one such ethical value. It answers a large part of business ethics practice in an organization. The survey makes an analysis on ethical practices such as nepotism, feelings on imposed unethical tasks, strictness behavior, created against issues for The analysis whistleblowing, data sharing. identifies nature of ethical practices and intensity of effect.

Figure 8: Nepotism in business organizations

According to the response of the respondents, around 34.6 percent of total respondents say that some special employees are shown nepotism to their favor. Besides, one-fourth employees of survey participators have confirmed that their leaders show nepotism in some specific sector. Besides, 38.5 percent of among participator admit that their leader is free from this being occurrence.

Figure 9: Pressure felt by the employee when an unethical task is imposed.

In a good organization, it is expected not to impose any unethical behavior on an employee to perform. But if intentionally imposed by anyone on someone, that victim person must feel pressure to perform so. We raise this question to the correspondent to know their feelings. 36 percent of people feel huge pressure, 52 percent of employees feel average pressure. There are also 12 percent people who don't care anything.

Figure 10: Strictness of organization on an unethical behavior

34.6 percent employees think, their organization does no compromise to an unethical behavior and it goes on a direct action. Around 57.7 percent of employees know that their organization is loose to the rules depending on the situation. But there still 7.7 percent of employees who think their organization is loose enough to be strict on an unethical behavior and overlook the situation.

Figure 11: Created issues for whistleblowing

A bad practice of an organization is whistleblowing. We've asked out among the respondents whether any incident related to whistleblowing occurred in their organization or not. One-fourth of them, around 24 percent think YES. One-third think of them directly deny that their organization is completely free from happening to this. 44 percent actually don't know about this.

Figure 12: How much Feel free to Data Sharing

3. Supporting Ethical Issues at Organization

This section of the report takes an overview at how organizations support different ethical issues. Participants were asked about the policy of managed by the organizations such as code of conduct, training on ethical knowledge and behavior, monitoring system etc. to make a consistent business. They were also asked how their organization treat on unethical conduct. Further different questions were also asked to overview how organization supports ethical issues.

Ethical policy at organization

Respondents were asked whether their organization follows any ethical policy to support different ethical issues. Ethical policy increases the reputation of an organization. Nowadays ethical policy is taken by organizations to make a sustainable and community supported business. Almost two-thirds of respondents (73%) indicated

that their organization follows different ethical policy. And 15% of respondents indicated that their organization does not follow any ethics policy. Moreover, 11% of the respondents indicated that they follow some ethics policy but not strictly.

The majority of the respondents say that they have followed ethical policy in their organization.

Figure 13: Ethical policy in business organization

Code of conduct

Respondents were asked whether it is necessary for employees to sign code of conduct statements in the organization. Above half of the respondent (53.8%) are indicated that they have signed code of conduct in organization. And 34.6% respondents indicated that they have signed code of conducts for some special case. Moreover, 11.5% of the respondents indicated that they do not have signed any code of conducts statements.

Figure 14: Code of conduct statements in business organization

Trained ethical knowledge

To support ethical issues in business organization, it is important to trained employees about ethical knowledge and behavior. In competitive business world it's necessary to treat customer more ethically. So, in our survey, we asked the respondents whether the organization require trained ethical knowledge. About 46.2% of the respondents indicated that their organization requires ethical knowledge training. And 34.2% of the respondents indicated that they do not need any training about ethical knowledge. Moreover, about 19.2% of the respondents indicated that their organizations training require on ethical knowledge.

Figure 15: Require Ethical knowledge training

Monitoring Unethical Activities

In business organizations, every employee should behave ethically. Because it is necessary to create a good working environment in the organization. There are some common unethical behaviors that observed in the organization. For example, abuse of working time, abusive behavior, employee theft, lying to managers, violate company internet policies. To prevent unethical or unrecognized issues monitoring system plays a vital role.

We asked the respondents whether their organization have any monitoring system for the employee's unethical activities. Above half of the respondents (57.7%) indicated that their organizations maintain a monitoring system for the employee's unethical activities. And 23.1% of the respondents indicated that their organizations

maintain a monitoring system for employee's unethical activities in some sectors. Moreover, 19.2% of the respondents said No on that questions.

Figure 16: Monitoring system in the business organization

Penalty System against Unethical Behavior

As unethical behavior is not accepted from employees in the business organization. So, unethical behavior needs to be punished so that all employees behave ethically and make a good work full environment. For that, on our survey, we asked the respondents whether there any penalty system against unethical behavior in organization. Above two-third of the respondents (84.6%) indicated that they have penalty system in their organization. And 15.4% of the respondents indicated that they do not have any penalty system.

Figure 17: Penalty system against unethical behavior

Integrity in Organization

Organization integrity is mainly ethical integrity of individual employees, ethical quality in their actions and decision making. To make an advantage of competitive business world, every employee in the organization should act with integrity. So, organizations need to encourage employee or rewarded employee to work with integrity. So, we ask the respondents whether their integrity rewarded in their organization. About 15.4% of the respondents indicated that they have always rewarded. About 38.5% of the respondent indicated that they have rewarded most of the time. And 38.5% of the respondents indicated that they have rewarded sometimes in the organization. Moreover, about 7.7% of the respondents indicated that they never gain any reward.

Figure 18: Integrity rewarded percentage in organization

Control on Whistle Blowing

Whistle Blowing is an effort to attract public attention to a negligent, illegal, unethical, abusive or dangerous act by a company [16]. It is an important ethical issue for individuals and organization. So, we asked the respondents how much their organization confidentially control on whistleblowing. About 34.6% of the respondents indicated that their organizations are very much confident. Almost half of the respondents (46.2%) indicated that their organization are confident but fails sometimes. And 19.2% of the respondents said that they do not know about this.

Figure 19: Control on whistleblowing

Importance on software piracy

Respondents were asked how much importance their organizations give on software piracy. Above half of the respondents (53.8%) indicated that their organizations give significant importance on software piracy. About 34.6% of the respondents indicated that their organizations give strong importance and 11.5% indicated weak importance on software piracy.

Figure 20: Importance of software piracy

Avoiding Unfavorable publicity

Unfavorable publicity is another ethical issue that needs to support in the business organization. So, we asked the respondents whether their organizations follow any policy to avoid unfavorable publicity. Above half of the

respondents (56%) indicated that they have the policy to avoid unfavorable publicity. About 24% of the respondents indicated that they do not follow any policy. And 20% of the respondents indicated that they may have some policy.

Figure 21: Avoid unfavorable publicity

Risk Assessment policy

assessment policy for the business organization is the set of procedures or steps that will be taken to provide with their employees with least amount of risks when they performing their jobs. The procedure may be including employee training, good working environment and upgrade quality products. We asked the respondents whether their organizations maintain any ethical risk assessment policy. About 65.4% of the respondents indicated that they have risk assessment policy. About 30.8% of the respondents indicated that they do not have any policy and other indicated they do not care about any risk assessment policy.

Figure 22: Ethical risk assessment policy

4. Findings

From the analysis of the collected data, an overall positive view of ethical practices is observed in business organizations. The employees show honesty in workplace. Survey shows that 42.3% employees always show honesty, 38.5% show honesty as much as they can show and 15.4% sometimes show honesty in workplace. About 46% of the organizations protect whistle blowing with confidently but fails sometimes and 34% handle it with very strictly. In ethical practices, nepotism is found significantly in the organizations. 36% of the organizations show nepotism to some employees, 26% in some sectors and 38% never show nepotism. In the case of software piracy, 34% of the organizations give strong concern, 53% give significant and 11% give a weak concern. For the support of ethical standards, about 73% of the organizations have a code of conduct.

V. Conclusion

In this survey, we have tried to find out the attitudes and perception of the employees and managers in an organization. Especially, how they behave toward the organization with ethical standards and how the organizations maintain ethical issues. There were total 28 responses from 12 organizations. So far we have found through our survey, it helped to analyze the state of the ethical perspectives of the business organizations.

VI. Description

In this survey, we try to analyze different ethical issues that are handled by the business organizations. Our motive is to analyze ethical policy of different organizations that they follow to avoid ethical problems. And we also try to identify how organizations support employees for ethical behavior and knowledge. In the organization, there are many ethical issues arise that creates ethical problem in the business organization. One of the ethical issues is the lack of integrity. So, to avoid ethical problems, every employee should act with integrity in decision making and to their workplace, because integrity is considered to the first core value of business ethics. Any unethical behavior from an employee is not expected anymore. For this, an organization should have some statements also called code of ethics that are necessary for establishing business principles and core values. Every organization needs to manage ethical training for fresher's and also for old employees. The organization sometimes support ethical behavior and decision making with reward and encourage employees to continue this practice. Business organizations have also some risk assessment policy for the employees when employees performing their job.
